Collaboration between Mansoura University and Arab Business Institutions to establish a Center for Technological Incubators in the field of Information Technology

in the framework of a fruitful collaboration between Mansoura University and Arab Business Institutions, the University Vice-president for Community Service and Environment Development

Affairs presided over the first meeting of the Public Service Center for Technological Industries in the presence of representatives of Badder Development Institution and the United Bank. The meeting discussed the following issues:

- 1. Maximum benefit from the projects of technological industries.
- 2. Adoption of the constructive projects presented by young researchers in the field of communication technology which in turn, will play a great role in the development of the system of information technology in Egypt.
- 3. Starting a bank of ideas and a scientific database

The representatives of Badder Institution have commended the distinguished academic status of Mansoura University in the field of information technology especially the students of the Faculty of Engineering who won international acclaim in this field. This is what encouraged these institutions to collaborate with Mansoura University in the immediate set-up of these incubators.

By the end of the meeting, Prof. El Meligi urged the start-up of the project and thanked the attendees.

The National Campaign Initiative for eliminating Illiteracy

On Tuesday 4/9/2013 Professor Mahmoud El Meligi -the University Vice-president for Community Service and Environment Development Affairs has met in his office with the team - members participating in the national campaign for eliminating illiteracy

. The meeting began with the discussion of the letter of the Minister of Higher Education urging all Egyptian Universities to organize a national campaign for removing illiteracy 2012 - 2020 in collaboration with NGO'S and UNISCO regional office in Cairo. The aim of the letter was to mobilize public opinion, provide resources, and co-ordinate efforts for the reduction of the numbers of illiterate people and their percentage to less than %10 to cope with the accepted international percentages by the year 2020. The meeting stressed the effective roles played by students, staff-members and administrators in this respect. The participants raised some ideas and suggestions which will contribute to the success of the initiative. By the end of the meeting, Professor Mahmoud El Meligi has urged the attendees to make a count of the number of the illiterate workers at the university and to prepare a full-fledged proposal to eliminate illiteracy at Dakahlia Governorate to be discussed in the following meeting.

The Cultural Program of the Center for Values and Patriotism Studies.

The Center for Values and Patriotism Studies at Mansoura University is one of a kind at the Egyptian and Arab Universities. It represents a landmark at Mansoura University specifically when the issue of values is a matter of concern

.This issue of values is taken to be a cornerstone for the Egyptian national security and it has enjoyed a paramount importance all over the Egyptian history. The aims of the center focus on promoting Egyptian national spirit among the youth, enriching the sense of patriotism and civilization driving forces on a clear basis of duties and responsibilities for the sake of building the future of Egypt. It is the embodiment of all educational standards aiming at preparing the rising generation for the art of living for Egypt.

The center's cultural program for the academic year 2013/2014 is as follows:

- ١ The Symposia

- The symposium on “Egyptian Patriotism: Concept and Responsibilities”
)in collaboration with The Faculty of Arts –Mansoura University : Wednesday/ third week of October(
- The symposium on “Egypt: A Country of Civilization... A Future Vision”
)in collaboration with The Faculty of Education –Mansoura University : Wednesday/ third week of November(
- The symposium on “Egypt as envisaged by its Youth”
)in collaboration with The Faculty of Commerce –Mansoura University : Monday/ third week of February(
- The symposium on “The Youth and the Future of Egypt after the Revolution”
)in collaboration with The Faculty of Law –Mansoura University : Monday/ third week of March(

.٢ Training Programs and Workshops

- The program for preparing youth cadres in the field of Values of Patriotic Affiliation and responsibilities of Egyptian citizenship
- The program for activating the set of values in opposition to violence and corruption.

Coordination steps are taken with the General Administration for Youth Care at the University in order to facilitate the implementation of the training programs at different faculties on a weekly basis.

)A faculty is to be selected every week – The weeks assigned for symposia are to be excluded- Time is to be scheduled at the end of the week(

Program Duration: 5 hrs. (2 lectures/ 3hrs.+ 1 workshop/ 2hrs(.

-٣ The Cultural Forum of the Center for Values and Patriotism Studies at Mansoura University.

The forum focuses on workshops and dialogues among students concerning the current events and issues at the Egyptian society. This helps the students realize their responsibilities in supporting Egyptian efforts aiming at future development.

The Forum will be organized to include specifically the students of the practical faculties. The activities of the forum comprise understanding events, making judgments and realizing the third dimension which is the right of the country within the overall social scene.

-٤ The Touring Camera Program.

It is a talk show for university students that aims at asserting the concept of Egypt as envisaged by its youth. The program is recorded live with students inside the university. The interviews are conducted by the students of Mass Communication Department at the faculty of Arts and the staff of the Information Center of the university.

(First week of December/ second week of April

A message to every working woman at Mansoura University

The beginning of the campaign for the early detection of Breast Diseases and Tumours in the faculties from 15/4/2013 to 7/6/2013

*Do you know that

- Breast cancer among females is the most important and dangerous type of cancer. It is considered the commonest type not only in Egypt but in the whole world: one woman among eight is predisposed to breast cancer at one period of her life before the age of 80.

- The early detection and treatment of breast cancer usually results in complete recovery while late detection leads to the spread of the disease in such a rate as to become irrecoverable.

- Early detection of the disease occurs as a result of the awareness and complete knowledge of breast tumors and other similar breast problems as well as the means of prevention and early diagnosis.

*Because of the strong conviction of the Sector of Community Service and Environmental Development that prevention is better than cure; the General Administration of Environmental Projects in co-operation with the Faculty of Medicine intends to initiate a number of awareness raising sessions and examination clinics, for the early detection of breast tumors among the working women at Mansoura University.

Therefore you have to:

First, contact the Sector of Community Service and Environmental Development at your faculty to know the week assigned for your Faculty and the place of the sessions, the clinic, and the schedule. You also have to decide

....

on an appointment for a free examination, in case you have a complaint.

Second, attend the orientation session on different breast diseases and problems that women are exposed to including breast cancer. The session will be held on a Monday at 10 o'clock on the date assigned for your faculty and will be followed by a discussion with Dr. Omar Farouk, Professor of Oncology in the Faculty of Medicine, Mansoura University who will answer the attendants' questions. This will be followed by distributing a handout including illustrations of the steps of self examination that should be performed by every woman (married or unmarried) starting from the age of twenty. All your queries concerning this topic will be answered, including the following questions:

Report 2013

Mansoura University
Sector of Community Service
and Environmental Development

- What is the incidence of breast cancer in Egypt?
- Do you know the risk factors for breast cancer?
- Do you know the procedures for self-examination, the early detection for breast cancer?
- Do you know how breast cancer is diagnosed? Do you know the importance of mammography and surgical biopsy as a means of diagnosis?
- What do you know about the different modalities of breast cancer treatment (Chemotherapeutic, hormonal, radiological, and local)?
- What do you know about onco- mamoplastic surgery?
- How do you deal with a breast cancer patient?
- What do you know about medical follow-up of breast cancer patients and about its cure rate?
- What do you know about benign breast tumors?

Third, in case there is a breast problem such as tumors, masses, secretions or pain, you have to go to the medical clinic at your faculty on Monday, Wednesday, or Thursday from 11 o'clock to 1 o'clock during the week assigned for your faculty. You will be examined by Prof.Dr. Omar Farouk (Associate Professor of Oncology, Faculty of Medicine, Mansoura University) who will attend to your complaints.

Fourth, in case a mammogram is needed, you will be referred to the radio-diagnostic department to have the investigations done.

Fifth, Participate with us by raising the awareness of your daughters, relatives, neighbors, friends and all society for according to the Prophet's Hadith we are all responsible for those who are in our charge.

Participate and be positive. Do not hesitate. Prevention is better than cure.

Fight and resist with us. Fight breast cancer among women.

It is a battle worth fighting and we should all co-operate against cancer and fight it with all means possible.

Together against cancer by awarenessraising and early detection

The Second Societal Consultation Council

Under the auspices and with the presence of Prof. Elsayed Ahmed Abd El-Khalek, President of Mansoura University, The Second Societal Consultation Council of Mansoura University was held in

the Conference Hall at The Delta Company for Fertilizers and Chemicals on Tuesday 28/05/2013 in response to the invitation of Engineer Mohamed Abdelhameed Nasser, Head of the Board of Directors, with the attendance of Prof. Mahmoud Mohamed Al Meligy, University Vice-President for Community Service and Environment Development Affairs and the General Commissioner of the Council; Prof. Ali Hassan Etman, University Vice –President for Education and Student Affairs; Prof. Magda Ahmed Nasr, University Vice-President for Higher Studies and Research; and the Council Board. The session secretarial work was performed by Mr. Ihab Ragab Elsherbiney, Manager of University Vice-President office.

The session started with a speech for Engineer. Mohamed Abdelhameed Nasser, Head of The Delta Company Board of Directors, in which he welcomed the attendees and thanked them for coming and allowing this event to take place at the company premises. Following the welcome address a presentation about the factory was made then the topics in the session agenda were discussed with special emphasis on strengthening the relations between the university and the community including factories and companies. The idea of this issue is to promote mutual interests and serve the region and the environment with the purpose of overcoming routine and traditional thinking to the benefit of Industry, community and university. Regarding this point in particular, Prof. Elsayed Ahmed Abd El-Khalek, President of Mansoura University, highlighted the efforts of the university in solving the problems of factories, providing them with working cadres, and training graduates to be qualified for working in the sector of industry and in turn the role of the university should be reviewed and the parties involved should have the will to achieve the targeted aims as the university is an indispensable partner

The Environmental Day at the Faculty of Nursing

On Wednesday, 04th of December 2013, Prof. Mahmoud Elmeleigy, the Vice- President for Community Service and Environment Development Affairs has attended the opening ceremony for

the Environmental day which was organized by the faculty of Nursing under the name of "Environment Support Day". The Day was under the supervision of the faculty's Dean and the attendees included the Vice-Deans for many faculties. The University Vice-President stressed upon the idea that the Day aims at promoting the sense of positive participation among students, making use of their potentialities, encouraging them to take part in charity works and developing environmental awareness among students and employees.

The Vice –President toured the faculty centers and labs and was informed about the recent accomplishments, in addition he saw the guiding booklets and brochures that help students and community members avoid risks and overcome obstacles in their contact with the environment.

The faculty Vice-Dean stated that the Environment Day included various activities like health symposia, artistic and sports competitions, blood donation campaign, and a charity fair.

The Environmental Day at the Faculty of Specific Education

On Wednesday, 18th of December 2013, the faculty of Specific Education at Mansoura University celebrated the Environmental Day with the honorable attendance of Prof. Mahmoud

Elmeleigy, the Vice- President for Community Service and Environment Development Affairs. Many Vice-Deans were present at that Day, in addition to the Dean of the Faculty who gave the attendees a warm welcome.

The activities of the Day started by a welcome speech by the Vice-Dean for Community Service; then it was followed by a video conference in which the attendees watched a live broadcasting of planting trees at the faculty.

Then a sculptural work of art was shown to the public after that the attendance visited handcraft, environmental awareness, art exhibits and watched a theatrical performance that called for environment saving.

The Day was considered an audition for the participation of the faculty in the Environmental Week of the Egyptian Universities at Mansoura University in February 2014.
